LED LIGHTING

Indoor Industrial Lighting

LED Lighting Systems are installed by our company in accordance with the project and specification requirements. Systems are categorized as EXTERNAL and INTERNAL according to the environment where the lighting will be made.

External Lighting Systems; It can be expressed as Road Lighting, Area / Square Lighting, Outdoor Lighting, Fuel Station (Canopy) Lighting, Stadium Lighting and Visual Lighting.

Indoor Lighting Systems; It can be evaluated as Industrial Factory Lighting and Administrative Building / Office Lighting.

In the systems established by our company; The efficiency, savings and long life of the system are essential. Therefore, automatic control of lighting is very important. In this context, our company lighting systems; It is designed on the basis of controlling the systems according to the sunrise and sunset, reducing the luminous flux in the desired time interval with the DALI method, and the systems working with SCADA and PLC control.

Our company determines the number and characteristics of the luminaires to be used with the Lighting calculation made considering the characteristics of the environment at the beginning of the work for lighting projects. In addition, the amount of savings to be made after the establishment of the system is calculated and the recovery period of the amount paid for the investment is also determined. If there is conventional lighting available, in case of conversion to LED, the savings plan in this regard is presented to our customers by comparing the annual operating expenses.

PRATICAL AND INNOVATIVE SOLUTIONS FOR THE LOW VOLTAGE SYSTEMS

- Detailed Analysis
- Error-free Projecting
- User-Friendly Design
- Fast Production
- Test According to Standards
- Sturdy Assembly
- Smooth Commissioning
